I would like to take this time to introduce CODERED, emergency notification system for Morrow County. This system will call your're cell phone and/or home phone before a severe thunderstorm warning, tornado warning or flash flood for the area that you live. It will only call you if the storm is heading in the path of your home address you provide, calls are made 1000 calls per minute, only being called when National Weather Service sees the path of the storm heading to your location. You have several options on how to sign up, you may use this form, then mail it back, or fax it back using above information. You may also go to the website above use the link to CodeRed. You may also bring the form into the 9-1-1 center, or call the above number and I will collect all information from you.
